You feel as if you've known him forever, but that doesn't mean you know everything.

The Facts

Black women — more than any other women in the United States — are getting HIV. In fact, of all the women living with AIDS in the United States, 60% are African American. Two out of three of these women got HIV by having unprotected sex with a man.

The Good News

More and more women are looking out for themselves and getting tested for HIV. Why? Because, they are doing whatever they can to stay healthy. Whatever the test result, treatment and support programs are available in your community.

The Test

To learn more about free HIV testing or to find an HIV testing location near you, call 1-800-CDC-INFO (232-4636) or visit www.hivtest.org.
